Upcoming Webinar - Digitalization: Why Not Just Put It in the DCS?

As digitalization is becoming more and more common in the industrial world, many in this industry are questioning the opportunities and limitations of their current control system. In this webinar on June 8th, Griffin will discuss how the DCS can be enhanced in its capabilities while providing time and cost saving improvements as well as operational enhancements.

AI & The Aging Workforce

By 2024, the U.S. Bureau of Labor Statistics (BLS) projects that one-quarter of the U.S. workforce will be above the age of 55, and one-third of that segment will be 65 or older. With the aging industrial workforce challenge facing so many process organizations today, the AI Toolkit and Adivarent Control will help you capture the tacit knowledge that already exists in your team. This blog covers how Griffin can help close the gap for businesses with an aging workforce.
